PROJECT

Plantopedia | Full-Stack Plant Care Website

- Architected a full-stack web application from concept to deployment, demonstrating end-to-end project ownership and execution.
- Engineered a secure back-end using PHP and MySQL to manage user authentication, a dynamic feedback system, and personalized user profiles to drive engagement.
- Designed and developed a pixel-perfect, user-centric interface with Vanilla JavaScript, focusing on creating a seamless and intuitive user experience (UX) across all devices.
